Comecer Netherlands BV is expanding! To strengthen our international Service Team, we are looking for **Field Service Engineers** based in Belgium. In this role, you will help install, maintain and support high-tech systems that play a critical role in the (radio)pharmaceutical and nuclear medicine sectors.

Our solutions are developed and manufactured in Joure (The Netherlands) and are used in complex laboratory environments worldwide. Comecer Netherlands BV is part of the Comecer Group and ATS Corporation — a global leader in advanced technology and automation.

## What you will do

In this role, you will be responsible for installing, servicing, and maintaining Comecer equipment at customer sites throughout Belgium. You will carry out both preventive and corrective maintenance, ensuring that each system performs optimally and meets all operational requirements. In addition, you will provide training and technical support to end users, helping them understand and operate the equipment effectively. Throughout every assignment, you communicate clearly and professionally with customers and internal teams, representing Comecer as a trusted, solution-oriented technical expert.

## What you bring

You bring hands-on experience in repairing technical equipment and troubleshooting both mechanical and electrical issues. You are able to read and interpret electrical, pneumatic and mechanical drawings, and you have a background in electronics, electromechanics or mechanical engineering. In this role, strong communication skills and a customer-focused attitude are essential, along with a willingness to travel within Belgium and occasionally abroad. You have an energetic, proactive and solution-driven mindset.

Requirements:

- Technical degree at secondary or bachelor level (electromechanics, electronics or mechatronics).
- Strong English and French skills; Dutch is an advantage.
- Experience with PLC-controlled systems is considered as a plus.
- Valid category B driving licence.

## What we offer

- Full-time position.
- Competitive salary aligned with the Belgian labour market.
- Laptop, mobile phone and company vehicle (van).
- Competitive group insurance plan.
- Statutory Belgian vacation days plus possible ADV days.
- Plenty of training and professional development opportunities.
- A friendly, international and innovative work environment.
